

# Zehnder Lateo Neo

Hydronic operation

Product data sheet

always the best climate

The radiator solution is especially for the low temperature range. Zehnder Lateo Neo offers versatility, due to its compact construction, making it ideal for wall mounting, underneath windows or in alcoves. The subtle design suits every setting. The convector features simple installation and place-saving performance. The integrated fans with three-speed controller provide even greater output, even at low system temperatures. Available in almost any colour and finish from the Zehnder colour chart.

### Advantages

- Compatible with a heat pump and/or low-temperature systems
- Closed design due to compact construction
- Short response time means rooms can be heated up rapidly
- High thermal output means large rooms are heated up rapidly
- Invisible integrated connections
- The mounting bracket makes it easy to install
- Quiet, integrated fans with easy to operate controller ensure considerably shorter heating-up phase and more performance, convenience and comfort
